Our Dealer to Dealer online auction platform will be a refreshingly simply tool for the Brokers and dealers we serve to use on a daily basis saving them time and money.

Hello and thank you for reading this informative Business Profile that describes our “Phase 1 Rollout Dealer to Dealer Services.” Please note that this presentation was not designed as a full business plan. CarBids was founded by Dan Langley who has over 25 years in automotive dealer executive management which includes extensive experience in bulk new and used vehicle purchasing for major automotive groups. He has traveled the United States buying vehicles from brick and mortar auctions. Dan’s vision is to create an easy to use platform that is accessible 24 hours a day, 7 days a week for dealers and brokers to buy and sell vehicles online.

Now Everyone Wins!

As you will read in this business profile, CarBids will be doing several things other online auctions do not. CarBids encompasses current technologies that bring a multitude of benefits to those who use our platforms. We say platforms with an “S” because our “Dealer to Dealer” website will serve automotive dealers and brokers, while our second website will be geared towards retail consumers. We have custom written and designed this business profile to “sell itself” to potential qualified business partners and cooperatives that will form mutually beneficial relationships in both capital and operations. Our intentions are to provide ample information while protecting our IP (intellectual property). This document is not a solicitation for investment unless accompanied by a formal PPM (private placement memorandum) and no promise or offer of securities are being outlined herein.

CarBids is changing and disrupting the way vehicles are purchased by dealers and retail consumers alike. A lot of planning has been completed and remains ongoing by our CBDT (Core Business Development Team). This presentation directly flows with our second business profile for our Retail Consumers. CarBids is excited about launching our two platforms and welcome your reply.

There are many other aspects we will share as we evolve.

Our Dealer to Dealer online auction platform will be a refreshingly simple tool for the Brokers and dealers we serve to use on a daily basis saving them time and money.

Business
Profile
Phase One Rollout Dealer to Dealer Services

Phase One begins with the launch of our Dealer to Dealer online auction platform that has been custom designed in cooperation with Autoxloo.com, the leader in online auction software. Currently, CarBids has secured interests from over 400 dealers and wholesalers who are excited and eager to use this platform. This number will grow quickly over the first 24 months of operations.

The capital we raise and the cooperatives we build in phase one of our CarBids development will be the foundation for transitioning into phase 2 development. Our state of the art platforms will be easy to navigate and use while providing options, services, and 24/7 access that other platforms fall short on delivering.

This unique approach is ground breaking and will give our retail Customers a larger selection of options to choose from.

www.carbids.com

In Phase Two, CarBids will design and launch a “Reverse Auction” website for retail consumers. Our business profile for this phase provides a detailed outline of what we will be doing. The “Reverse Auction” concept puts the power of negotiations into the hands of the retail consumer who posts their needs to our website as a guest or a member, then receives “Bids” from our dealers and vendors providing a range of options for our retail consumers. We will be partnering with Autoxloo.com to build a software platform that operates both effectively and efficiently.

CarBids will do three things that will draw new dealers to work through us and for existing dealers to keep using us.

1

CarBids will offer beneficial and helpful features on our website and mobile app platforms that are appealing to users.

2

CarBids will function similarly to the top online auction sites so that navigation is not too great of a learning curve while being technologically advanced in what features are available for use.

3

CarBids will be one of the most complete, yet economical and easy to use online auctions available while also providing multiple optional service areas that we will not constantly pitch to our customers.

When you see how CarBids.com will operate and function we are confident that you will see that there are many reasons to choose us over the competition.

CarBids will start its operations providing (4) primary services to dealers who will use our online auction daily.

1 – Sale/Wholesale Vehicle Purchases:

The CarBids platform provides a simple two-way transaction to buy or sell. A fee of \$89 is charged to both the buyer and the seller resulting in \$178 in revenue per transaction for CarBids. Our platform will provide an easy to use online auction that allows our dealers to buy and or sell their vehicles easily to other dealers 24 hours a day, 7 days a week.

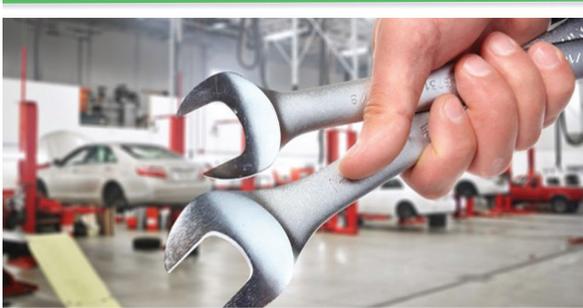

2 – Transportation:

CarBids will work with select local, regional, and national transport carriers with the ability to quickly pick-up and deliver one or more vehicles at a reasonable price. Our Dealers are welcome to use their own transportation method, however, when they use our arranged transportation, we will earn additional revenue courtesy of a 5% finder's fee.

3 - Service Provider and Vendor Services:

CarBids will charge a monthly or annual fee to give select service providers and vendors access to the dealers who use CarBids. With an initial focus on national providers to promote their products and services through our platform under controlled conditions and an easy transaction process that limits circumvention of our platform. This monthly fee will only be \$49.95 as we build our user-base.

4 – Concierge Suite:

CarBids will provide our dealers with custom designed concierge services based on individual needs that are specific to each purchase transaction or delivery. From custom detailing to aesthetic enhancements, accessories, and GPS tracking installations to white glove door to door delivery the fees we charge can get up to \$1,099 and go higher based on the requirements of each dealer individually. These services are quoted individually through our website and the minimum transaction fee for our service is \$199.

Our goal is to build-out this offering

as we evolve and grow CarBids.

Small, Medium, and Large Dealerships:

CarBids already has over 400+ small, medium, and large automobile dealerships ready to sign-up on our Dealer to Dealer Auction platform, and we are confident that we can grow this number substantially over a short period of time. The good news about our auto auction platform is that any dealer can use it anywhere in the entire United States, including Hawaii and Alaska. No matter how small or how big the dealership is, CarBids will quickly become a go-to resource for vehicle purchases and sales. We refer to the dealers and brokers we serve as “Clients” and CarBids will treat everyone we serve with the highest standards in customer service before, during, and after the transaction for each purchase or sale made on our platform.

Automotive Groups, Large Scale Retailers, Auction Houses, and Corporations:

From bulk sales and purchases, to fleet liquidation and dealership close-outs, or relocation, CarBids will be a resource for larger Clients. This is because using our platform is easy, economical, and accessible 24/7 for our Clients' convenience. Dealerships and Automotive Groups often have more than one Buyer who need to facilitate the sale and purchase of the vehicles they have in inventory and those they want to acquire on varying schedules. The "time independent" nature of our service eliminates this restriction.

CarBids will be a valued resource and we already have commitment from several larger scale Automotive Groups who will be using our platform upon launch and we will work to grow through our awareness campaigns and great word of mouth from current users.

Our Website

CarBids.com has a long-term contractual partnership with Autoxloo.com and we will be incorporating their advanced technologies into the CarBids.com website. These technologies are already proven in the marketplace and will give CarBids.com an incredible advantage as we evolve. We will be happy to elaborate on our Partnership with Autoxloo upon request.

Our Technology

Working in a partnership with www.Autoxloo.com, our website will incorporate their advanced technologies seamlessly in a unique configuration designed just for CarBids.com where our brokers and dealers will find it easy to use the features we offer. Autoxloo's IP (intellectual property) is now a part of the CarBids.com platform and our partnership ensures that our website will be reliable, fast, and secure.

There are many benefits to the dealers we serve and pages 11 and 12 outline the top six that CarBids believes will be instrumental in building repeat business.

24/7 TO PURCHASE AND SELL:

Selling dealers and wholesalers will no longer have to wait to take their vehicles off of their lots for days, hoping they will sell at auction. Both buying and selling dealers can access the buy and/or sell features of CarBids.com online auction 24 hours a day, 7 days a week. This saves both the buying and selling dealers, along with wholesalers, substantial time and money while providing convenience.

HOT SEARCH FEATURE:

The “Hot Search” feature is, by far, one of the most exciting features to both selling and buying dealers alike. Dealers and wholesalers are consistently letting CarBids know how much they are anticipating and looking forward to this specific feature. CarBids “Hot Search” program takes a tremendous amount of the time-consuming work load of looking and trying to find specific inventory to fill their dealership needs/ demands off the buying dealers hands. Simply put, CarBids does all the work for them. CarBids “Hot Search” system provides a variety of specific search options in order to quickly pinpoint the vehicles of their choice. This will include year, make, model, mileage, exterior and interior color options, condition report, price, and even the CarFax, just to name a few. Once this information is placed on the buying dealer’s “Hot Search” list, CarBids will continuously search the database from each and every selling dealer’s and wholesaler’s inventory that’s in CarBids system throughout the country 24 hours a day, 7 days a week, 365 days a year. CarBids will then immediately notify the buyer through multiple channels of communication once their desired vehicle or “Hot Search” list has been matched. This lets them know when, where, and what category the vehicle will be placed in.

OUR FLAT FEE TO BUY AND SELL:

Key excitement for buying dealers, selling dealers, and wholesalers here is “*No matter what the sale price of the vehicle is*”, CarBids will only charge an \$89 flat fee to buy and an \$89 flat fee to sell, paid individually by the buyers and sellers. This fee is the lowest in the country. This feature alone can save individual dealers and brokers tens of thousands of dollars a year and much more, allowing them to generate more profit for themselves.

Our long term partnership with Autoxloo will allow CarBids to remain at the forefront of new technology integration. CarBids will work tirelessly to create new benefits while maintaining those we currently offer.

21 DAY BUYER GUARANTEE:

Our agreement with our dealers means that sellers guarantee their vehicles for 21 days, or until the buyer fully inspects and accepts the purchase. A buyer has 4 days to inspect the vehicle once it has arrived to their location. This is an extra level of assurance that the buyers get what they expect and are paying for.

SECURE TRANSACTIONS:

A Buyer's money goes into a CarBids "escrow" account and is released to the Seller once the inspection and approval has been facilitated. This is an honor based transaction where Dealer to Dealer respect is enhanced through our policies and procedures that each dealer agrees to before working on our platform.

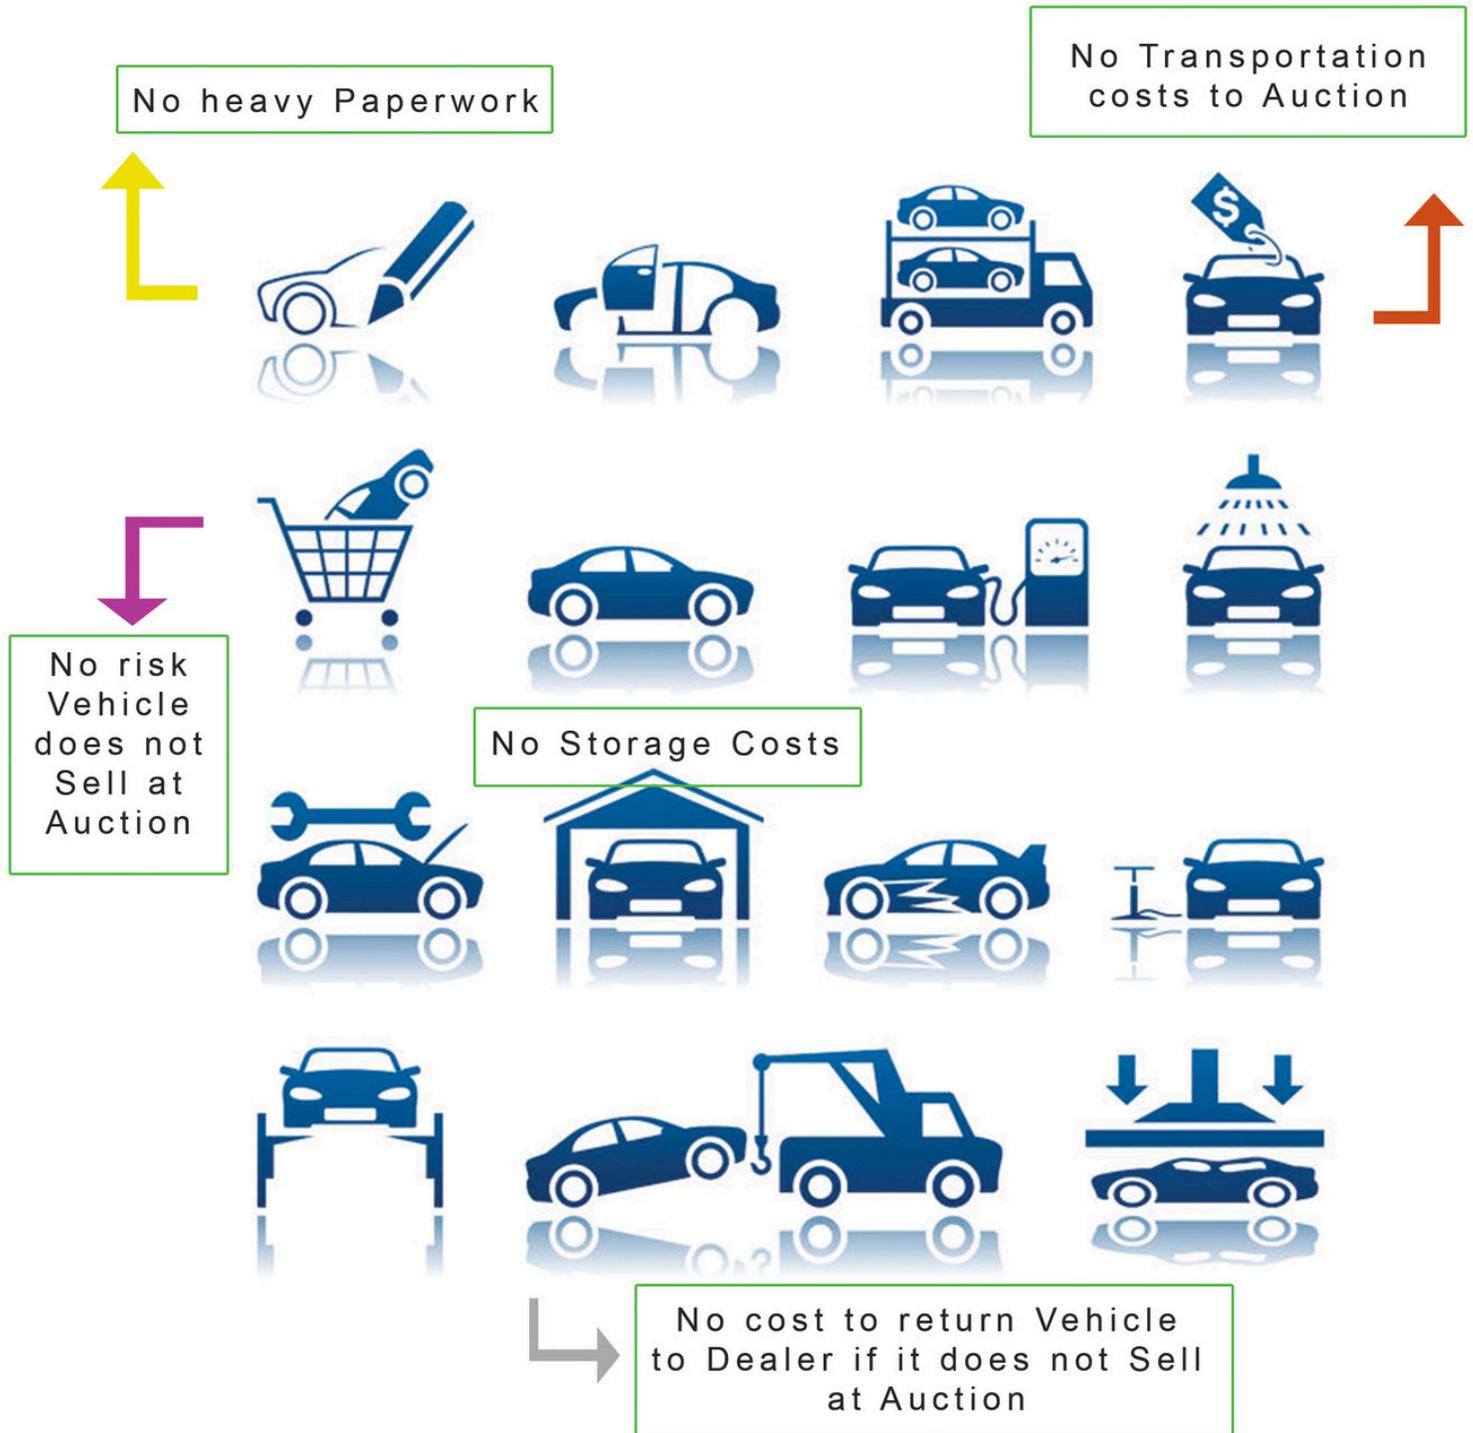

SHIPPING GRID LOGISTICS:

Our auction platform will estimate the cost from seller to buyer to facilitate the transportation, making it easy for the dealers using our platform to handle their transportation needs. Dealers can use their own transportation however the convenience offered on CarBids.com makes it easier to facilitate.

There's a minimum of (5) ways our dealers save money by using CarBids.com online auction as featured in this image. These savings can be substantial over the course of just a few transactions, and over the course of an entire year can easily exceed more than \$10,000 in savings. Brick and Mortar based auctions are risky for dealers, both large or small, and CarBids provides an amazing alternative.

The current technologies being offered by CarBids.com in cooperation with Autoxloo.com will attract dealers because we know what dealers want and need.

By providing a high standard in customer service before, during, and after the transaction, CarBids will set the new level of service standards that will appeal to those we have the privilege of serving. The new services and cooperative partnerships being developed by CarBids now is an intimate part of our IP (intellectual property) and will not be fully elaborated upon in this business profile.

It all starts with service...

Some dealers and brokers are looking for high quality features that will help them save time and money so that they can increase their own profitability. In some cases, the needs of an individual dealer or broker are unique and require special attention and/or a higher level of service.

That being said we have several new revenue streams we will introduce within the first 12 to 18 months of operation and we are very excited to grow from there.

CarBids has already secured sincere interest, that borders on complete commitment, by 400+ dealers to begin using our platform once operational. We are absolutely confident that we can grow from there very quickly.

CarBids has custom created our financial projections using a three tier system. This is where we describe what our 100% sales capacity may likely be in each revenue stream, and then we tier it down into 80%, 70%, and 60% to show a range of potentiality. We then cross reference expenditures on high, moderate, and low expectations to conclude with a realistic range CarBids will surely fall into. We acknowledge that a finite set of financial projections cannot be substantiated, so our formulas are presented to be more realistic.

Being an online auction platform does not limit us to a state or region, and this increases the probability of our ability to capture market share. The auto auction industry, be it brick and mortar or online based, represents billions of dollars in transactions annually.

CarBids' ability to capture even a small portion of this business initially will ensure our long term success. Our CBBDT (core business development team) consists of seasoned professionals within the automotive sales industry, and our platform is unlike anything available today.

Our Founder and CEO, Dan Langley, is leading our CBBDT to get new dealers signed up and ready to use our platform once we launch. His extensive expertise and knowledge of how auto auctions currently work, along with the issues and struggles of today's dealerships trying to constantly find quality inventory, has allowed CarBids.com to create a demand that leads to new users signing up with us. If you have any specific questions about our financial assumptions, or any other part of this business profile do not hesitate to contact us anytime and we will be happy to elaborate.

2019 through 2020 Revenue

| Revenue Stream | @ 100% | @ 80% | @ 70% | @ 60% |
|-------------------------------------|---------------------|---------------------|---------------------|---------------------|
| Sale/Purchase | \$42,720,000 | \$34,176,000 | \$29,904,000 | \$25,632,000 |
| Transportation | \$2,400,000 | \$1,920,000 | \$1,680,000 | \$1,440,000 |
| Services Provider & Vendor Services | \$250,000 | \$200,000 | \$175,000 | \$150,000 |
| Concierge | \$100,000 | \$80,000 | \$70,000 | \$60,000 |
| TOTALS | \$45,470,000 | \$36,376,000 | \$31,829,000 | \$27,282,000 |

2021 through 2022 Revenue

| Revenue Stream | @ 100% | @ 80% | @ 70% | @ 60% |
|-------------------------------------|---------------------|---------------------|---------------------|---------------------|
| Sale/Purchase | \$64,080,000 | \$51,264,000 | \$44,856,000 | \$38,448,000 |
| Transportation | \$3,600,000 | \$2,880,000 | \$2,520,000 | \$2,160,000 |
| Services Provider & Vendor Services | \$400,000 | \$320,000 | \$280,000 | \$240,000 |
| Concierge | \$200,000 | \$160,000 | \$140,000 | \$120,000 |
| TOTALS | \$68,280,000 | \$54,624,000 | \$47,796,000 | \$40,968,000 |

Notes: The formulas used represent: a.) a two way \$89 transaction fee totaling \$178 for buying and selling vehicles through our online auction, b.) CarBids will receive a 5% fee for the transportation services derived off the total cost, c.) CarBids will receive a 5% fee off all products and services sold through our platform and a minimum flat rate fee for concierge services will be \$199. Our formulas are a very simple, however, instrumental part of our IP (intellectual property), and can be shared selectively upon request in order to establish how we arrived at the above figures related to potential revenue. These figures are pre-tax, post expenditure (PT/PE) and do not reflect true profitability.

Through 2020 Expenditures 2019

| Expense | High | Moderate | Low |
|-------------------------|---------------------|---------------------|---------------------|
| Payroll & Contractors | \$10,000,000 | \$8,000,000 | \$6,000,000 |
| Office & Utilities | \$350,000 | \$325,000 | \$300,000 |
| Platform Management | \$200,000 | \$200,000 | \$200,000 |
| Outsourcing | \$2,000,000 | \$1,800,000 | \$1,600,000 |
| Advertising & Marketing | \$3,000,000 | \$2,500,000 | \$2,000,000 |
| *Other | \$4,000,000 | \$3,500,000 | \$3,000,000 |
| TOTALS | \$19,550,000 | \$16,325,000 | \$13,100,000 |

Through 2022 Expenditures 2021

| Expense | High | Moderate | Low |
|-------------------------|---------------------|---------------------|---------------------|
| Payroll & Contractors | \$16,000,000 | \$14,000,000 | \$12,000,000 |
| Office & Utilities | \$1,000,000 | \$900,000 | \$800,000 |
| Platform Management | \$400,000 | \$400,000 | \$400,000 |
| Outsourcing | \$5,000,000 | \$4,800,000 | \$4,600,000 |
| Advertising & Marketing | \$4,000,000 | \$3,800,000 | \$3,600,000 |
| *Other | \$8,000,000 | \$7,800,000 | \$7,600,000 |
| TOTALS | \$34,400,000 | \$31,700,000 | \$29,000,000 |

*Notes: (*Other) represents unknowns that CarBids realizes will need to be figured into our expenses. We have set this figure on a realistic basis. *Other also includes knowns that are not itemized individually. The “High” column represents what CarBids will expect to spend at the higher tiers of our revenue whereas the “Moderate” and “Low” columns are at the lower tiers of our revenue expectations. Again, the formulas used to derive these figures are a part of our IP and are not meant for initial public consumption. Repayment of private loans, and or investor returns are not shown herein.

2019 through 2020 Pre-tax, Post Expenditure Profitability

| Expenditure Tier | @ 100% Revenue | @ 80% Revenue | @ 70% Revenue | @ 60% Revenue |
|-------------------|----------------|---------------|---------------|---------------|
| High Expenses | \$25,920,000 | \$16,826,000 | \$12,279,000 | \$7,732,000 |
| Moderate Expenses | \$29,145,000 | \$20,051,000 | \$15,504,000 | \$10,957,000 |
| Low Expenses | \$32,370,000 | \$23,276,000 | \$18,729,000 | \$14,182,000 |

2021 through 2022 Pre-tax, Post Expenditure Profitability

| Expenditure Tier | @ 100% Revenue | @ 80% Revenue | @ 70% Revenue | @ 60% Revenue |
|-------------------|----------------|---------------|---------------|---------------|
| High Expenses | \$33,880,000 | \$20,224,000 | \$13,396,000 | \$6,568,000 |
| Moderate Expenses | \$36,580,000 | \$22,924,000 | \$16,096,000 | \$9,268,000 |
| Low Expenses | \$39,280,000 | \$25,624,000 | \$18,796,000 | \$11,968,000 |

Notes: As an example, if you take 100% revenue minus high expenses, the PT/PE profitability is \$25,920,000 for 2019 through 2020. CarBids does not expect to reach the highest level of income for the business, however, these figures are a representation of our “capacity” to generate the revenue shown after becoming operational in 2018. It should also be noted that Car Bids only projects having 1,000 dealers on our platform in the first year and only 1,500 for the second year, a number we can easily exceed.

The strategies outlined below are the “exact same” as those outlined in our business profile for our phase two development.

This business profile is not a solicitation for investment capital and no allocation of or promise of securities in any form are being offered through this document. That being said, the following primary options are available and are being explored by CarBids.com and its Senior Management.

- The registering of a PPM (private placement memorandum) such as a 506 Regulation D (b) is something we are considering.
- The private sale of equity into our business to a premier Cooperative Partner, several of which we are in negotiations with now.
- Through a PLA (private loan agreement) created and structured to adhere to all applicable State and Federal compliance and regulatory guidelines.
- Through other creative strategies such as an acquisition or merger where the assets and income of the entity(ies) can be leveraged for our financial benefit.

CarBids.com and our parent company GetCarBids, Inc. are exploring a diversity of options to raise the capital we need. In order to successfully launch our e-commerce platform and start generating immediate revenue, we are considering raising capital in stages if necessary.

The specifics of our decision, and the details of the “how to’s” we use, will become another element in our IP (intellectual property), and as a result, will not be openly disclosed. We are, however, confident that one or more of the strategies listed herein, and others not disclosed, will be successful for us and we are excited about the possibilities.

Our two primary strengths are in the demand for our online auction platform and in the fact that CarBids already has 400+ dealers and brokers ready to sign-up.

Through the careful selection of our CBDT (core business development team) we have worked to diligently eliminate weaknesses.

S

W

O

T

CarBids has the ability to capture market share and to grow our offerings through both website and app platforms.

As with any industry, our primary threats are in state and federal regulation changes that may impact how we do business and we stay current on changes.

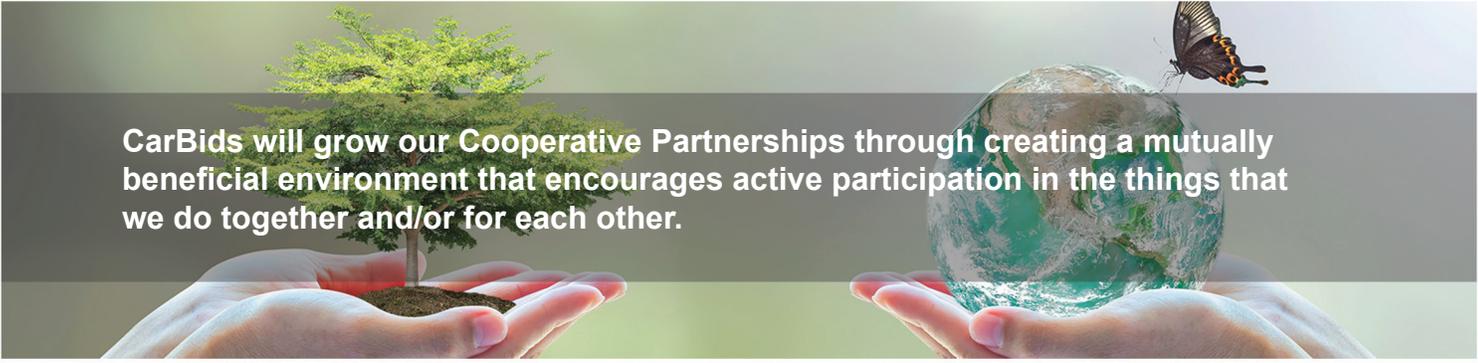

CarBids.com is working with industry leaders to build a platform where we can perform for those we serve. Our CBDT (core business development team) has researched a large number of options and have formed working relationships, directly and indirectly, with other businesses that are instrumental to our success and who have a desire to work with CarBids on a long term basis. A complete list of our Cooperatives can be given upon request since this list will evolve as we grow our platforms.

Autoxloo is building our custom platform for CarBids.com to include our mobile apps. They are an industry Leader with a proven track record of success.

Through Autoxloo and/or our own direct build-outs, CarBids.com will have api access to other platforms and this may include CarFax.com.

CarBids will grow our Cooperative Partnerships through creating a mutually beneficial environment that encourages active participation in the things that we do together and/or for each other.

CarBids will maintain a high level of communication with our Cooperative Partners to see how we can perform better and to discuss opportunities for us to grow our relationships further.

CarBids understands that our Cooperative Partners, like us, need results from actively participating in any initiatives agreed upon, and our intentions are to help our Cooperative Partners reach their own goals.

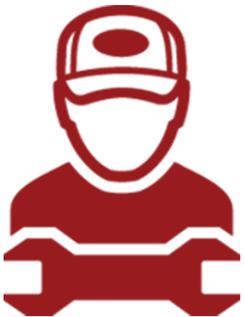

WITH OUR BROKERS AND DEALERS:

CarBids online auction will be a user friendly environment where those we serve have access to tools that make their jobs easier to perform and save them money. We want our brokers and dealers to use CarBids more and more. To accomplish this, we must provide the highest standard of customer service possible and work with our brokers and dealers to make their experiences on CarBids.com great every time. By doing this, CarBids cultivates our relationships with each user of our platform individually.

WITH OUR SERVICE PROVIDERS AND VENDORS:

Our platform will provide the service providers and vendors we select with a continuous flow of new potential customers, which has tremendous value. By “making available” the products and services of our service providers and vendors without sales pitching to every visitor that comes to our website, we cultivate trust and rely on the fact that our platform options sell themselves. This cultivates a positive relationship with each service provider and vendor as they see their sales increase because of their availability on our platform.

EVERYTHING!

Just wait
and you
will see for
yourself!

- We are going to operate the most user friendly, economical, and beneficial online auction platform in the United States.
- Aside from saving both our dealers and Customers time and money, our websites and mobile apps in phases one and two will provide our users with an easy experience they will want to use over and over again.
- CarBids has assembled an amazing Senior Management Team and is building a highly effective CBDT (core business development team).
- Our focus on Cooperative Partnerships and on streamlining the online auto auction processes is laser targeted, and what we are doing has not been done before.

The experts at Autoxloo.com agree that once our custom software/platform is complete and operational for the Dealer to Dealer online auction, we can quickly transition into phase two where our focus will be on the

Consumer Retail Reverse Auction platform

Our concept is already in place, as you can read in the second business profile accompanying this one, all we have to do is build-out the second website and mobile apps. This is easier once we have a foundation that is derived from the first software/ platform we are creating now.

Autoxloo.com has a reputation in the auto auction industry that is second to none, and is the Lead Developer for both platforms owned by CarBids.

Additional information may be shared, however, we have chosen to protect the intimate details of our IP (intellectual property).

Both websites are uniquely different and both bring to the industry a new way of buying and selling vehicles online, as well as offering services that complement the process.

Our IP (intellectual property) has a value which drastically increases the closer we get to launching our first platform for the Dealer to Dealer.

CarBids.com has signed a long-term contractual partnership agreement with Autoxloo.com and we now share their extensive IP.

What we can share, is that CarBids will be utilizing the most current technologies available and will have API (application programming interface) agreements with other data providers so that we can meet and then exceed the requirements of those we serve. Other platforms do use current technologies and offer a wide range of data port access from different entities via API access. This is not something we will recreate.

CarBids will simply create a more user friendly, economical, and varied platform with functions that make the vehicle buying processes for brokers and dealers more streamlined.

Certain aspects of our IP may be shared upon request based on a predetermined, need to know basis, so feel free to contact us for more information.

About our CBDT:

Our core business development team is currently made up of paid consultants, contractors, and businesses who are working for CarBids through contract agreements. Some of these members may become more involved, and others may assist CarBids in selecting candidates to fill the positions. We are building a highly capable CBDT and many roles are not yet filled with our own personnel.

About the Financial Transaction Functions:

Our platform is currently under development and design and while we know the “How’s”, we have multiple options to choose from. Our merchant portal will likely be customized to fit our unique needs which will be completed by our bank or merchant services provider using the API guidelines set forth by our Developer, Autoxloo.

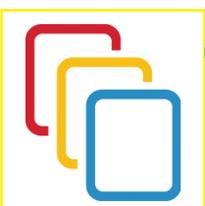

About our Dealers and Cooperative Partners:

We have chosen to selectively share more intimate details of our broker and dealers, as well as the major corporations who have an interest in participating with us. We already have a growing list of brokers, dealers, Cooperative Partners, Service Providers, Vendors, and Major Corporations who are committed to doing business with CarBids and we can easily grow this list quickly.

How we arrived at our Financial Projections:

While the numbers presented are in the 100% revenue capacity of the first two categories of sales transactions and transportation, what you do not see is the formulas used and how we have presented those figures. For example, we only show 1000 brokers/dealers using our platform within the first 18 months of operation. However, we already have 400 dealerships committed and excited about the launch of this operation. Of the lowest possible number of transactions we expect from each broker/dealer, we only show 40% (or less) of them using our transportation services where we only receive a 5% fee. In reality, the numbers are much higher, so we have been reserved in our projections.

Everything Else:

Other information falls under our need to protect our IP (intellectual property) so that we do not disclose the intimate details of what we are doing.

The good news is that “Doing Business with CarBids.com” now represents “Doing Business with Autoxloo.com” as well because of our long-term partnership agreement. This partnership will enable CarBids.com to create two amazing auto auction platforms unlike anything in the marketplace today and we are excited about our phased rollouts. We invite you to do business with us as a Lender, Investor, Cooperative Partner, or as a broker or dealer as CarBids.com represents the newest technologies to make buying and selling vehicles easy.

CarBids.com will be operational soon and released immediately upon the completion of our internal beta testing. If you are a broker or dealer, please contact us to discuss the benefits of working with us and to schedule a free demo of what we are able to do for you.

We are absolutely confident that what CarBids.com brings to the table of your success is worthy of both your consideration and participation.

Have an incredible day!

Dan Langley
